

TITLE

**DECORATIVE SURFACE MATERIAL HAVING A DECORATIVE
PATTERN AND PROCESS FOR PREPARING THE SAME**

ABSTRACT OF THE DISCLOSURE

- 5 Decorative surface material having a decorative pattern in which a
combination of domains of varying sizes and colors are defined by shading
variations at the interfaces of adjoining domains, the decorative pattern being
provided by a process in which a flowable thermosettable molding formulation
having orientable particles mixed therein is divided into fragments which are mixed
10 together, the mixture is fed into a hot mold and pressure is applied to form the solid
surface material.
